

EMFA

emfa heritage

1922

EMFA's first generation of lighting producers; Andon Kasapoglu, is awarded his electrician's license

1927

Andon establishes his own electrician business

1940

Andon establishes Bakalit, a trading and electricians' shop in central Istanbul. He becomes the pioneer of importing Bakalite to Turkey and begins the production of electrical components for home and industry

1959

Andon Kasapoglu founds EMFA and builds a factory not far from his shop in Istanbul to produce sockets, switches, plugs, buttons, and other electrical components

1975

EMFA's 2nd generation of lighting producers, Rokos Kasapoglu, joins EMFA

1976

EMFA produces its first lighting fixture

1979

EMFA expands and invests in aluminum die-casting machines.

General manager, Haydar Demil, joins EMFA

1980

EMFA becomes accredited by the Turkish Standard Institute (TSE) producing in line with European and Turkish Standards and starts exporting to Europe

1984

EMFA shifts its focus on producing light fixtures

1990

EMFA expands and invests in an electrostatic painting facility and drying oven allowing for many different finishing colors

1993

Chief engineer, Serdar Akmansayar, and national sales manager, Recep Cayiroglu, join EMFA

1994

EMFA exhibits at Hanover Fair and exports to Middle East and Balkans

1996

First EMFA LED fixture is produced

2000

EMFA exhibits at the Light+Building Fair in Frankfurt for the first time

2004

Marketing manager Johannes Puhler, joins EMFA

2005

EMFA invests in CNC machining technology to accommodate small batch adaptations

2009

50th anniversary! EMFA now exports to more than 40 countries worldwide

2010

EMFA is awarded the ISO 9001 certificate

2012

EMFA's 3rd generation of lighting producers, Adnan Kasapoglu, joins EMFA

2013

EMFA builds a photometric laboratory to generate IES and Elumdat files of their fixtures

EMFA becomes sponsoring partner at Professional Lighting Design Convention (PLDC) in Copenhagen.

sustainability

EMFA does its best at employing sustainable business practices within the three traditional pillars of sustainability: environmental, social, and economic, as well as in the newly defined pillar; cultural sustainability.

Social

Being a family-run business, EMFA has always put importance on the social wellbeing of its team.

Today, some of the employees or their parents were around when the company was founded in 1959.

Cultural

In respect to the ancient civilizations that once inhabited Turkey, EMFA has named most of its product ranges after ancient cities and towns.

“The light of the ancient civilizations shine upon the world today through EMFA.”

Environmental

In 1996 EMFA began using LEDs in their production of light fixtures. Initially, when LEDs were only available in low power, they were the perfect choice to use in highlighting stairs and paths in low light areas.

Since then, LEDs have become more and more powerful and efficient, to the point that today EMFA can light an entire skyscraper (Spine Tower), with LEDs resulting in lower power consumption and maintenance costs compared to traditional light sources.

Economic

For nearly 6 decades and three generations, EMFA has successfully been a profitable business. Over the decades the management has made decisions aimed to give EMFA long-term results. One key factor has been to invest greatly in R&D to stay on top of the most modern technologies. EMFA has been using LEDs for nearly 20 years.

departments

Facilities

EMFA operates in a factory of 5.000 square meters with approximately 80 employees.

Having the following

departments on site enables EMFA to customize products according to customers' needs and have short lead times for delivery of large as well as small quantities.

Departments

- product design
- research & development
- engineering
- mold manufacturing
- thermoset material preparation
- thermoset pressing
- aluminium die-cast injection
- mechanical processing
- metal forming & pressing
- cnc milling
- painting & surface treatment
- electronics
- assembly
- packaging
- test lab
- quality management
- photometric lab
