

# MILET

## INDIRECT SURFACE MOUNTED FIXTURE

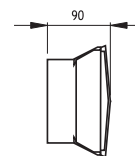

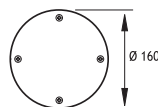

### Class I IP55 IK08

The Milet Indirect series consists of an on-wall fixture and a bollard using LED, halogen or fluorescent. The fixtures are made of a combination of a die cast aluminium head and an aluminium pipe painted with electrostatic powder paint. The wall fixture allows for a custom made sign showing room numbers or names. For the LED versions, a specially developed potted power cable is used to effectively bond with the cast resin and stop any water ingress. For the halogen and fluorescent versions, an IP connection box is provided to allow for a secure connection of the on-site cable.

<b>Cover</b>	<b>Gaskets</b>
Die cast aluminium	Silicone
<b>Paint</b>	<b>Diffusers</b>
Black or grey electrostatic powder	Polycarbonate
<b>Body</b>	
Die cast aluminium	
<b>Connection</b>	
IP connection box
